

SOYBEAN VARIETY 95M80

Abstract

5 According to the invention, there is provided a novel soybean variety,
designated 95M80. This invention thus relates to the seeds of soybean variety
95M80, to the plants of soybean 95M80, to plant parts of soybean variety 95M80 and
to methods for producing a soybean plant produced by crossing soybean variety
95M80 with another soybean plant, using 95M80 as either the male or the female
10 parent. This invention also relates to methods for introgressing a transgenic or
mutant trait into soybean variety 95M80 and to the soybean plants and plant parts
produced by those methods. This invention also relates to soybean varieties or
breeding varieties and plant parts derived from soybean variety 95M80, to methods
for producing other soybean varieties or plant parts derived from soybean variety
15 95M80 and to the soybean plants, varieties, and their parts derived from use of those
methods. This invention further relates to soybean seeds, plants, and plant parts
produced by crossing the soybean variety 95M80 with another soybean variety.
